Privacy policy

Privacy policy

Last updated: 27 May 2026 · TipGuard SA (Pty) Ltd

This policy explains how TipGuard SA processes personal information when you use our tipping platform. For POPIA rights and the information officer contact, see our [POPIA notice](#).

Information we process

- Account: email, name, phone (if provided), role
- Transactions: tip amounts, timestamps, Paystack references (not full card numbers)
- Guard/merchant profiles: display name, location, verification status
- Technical: logs, device type, IP for security

How we use it

To operate tips and wallets, prevent fraud, provide support, improve the product, and meet legal obligations. Payment card processing is performed by Paystack under their privacy policy.

Sharing

We use Supabase (hosting/database), Paystack (payments), and optional monitoring tools configured by your operator (e.g. Sentry). We do not sell personal information.

Retention & security

Data is retained as needed for operations and law. Row-level security limits database access by role. You are responsible for keeping your password confidential.

Terms & Conditions

Terms & Conditions

Last updated: 30 May 2026 · TipGuard SA (Pty) Ltd

These terms govern your use of TipGuard SA software and related services operated in South Africa. By creating an account or sending a tip you agree to these terms and to Paystack's payment terms where applicable.

The service

TipGuard connects customers with car guards and venue operators for voluntary digital tips. We provide software only; we are not a bank, insurer, or employer of guards unless your operator states otherwise in a separate agreement.

Accounts & roles

You must provide accurate registration information. Customer, guard, merchant, and admin roles carry different permissions. You may not attempt to escalate privileges or access data belonging to other users.

Payments

Tips and wallet top-ups are processed by Paystack. Successful charges are generally non-refundable except as described in our [refunds policy](#) or required by law.

Acceptable use

Do not use the platform for fraud, money laundering, harassment, or unlawful activity. We may suspend accounts to protect users or meet compliance obligations.

Liability

build:1788484883721

Refund policy

Refunds & disputes

Last updated: 27 May 2026 · TipGuard SA (Pty) Ltd

Tips are voluntary payments to car guards. Once Paystack confirms a successful charge, funds follow your operator's payout schedule to guards or venues. TipGuard software does not hold customer funds as a bank.

Failed or duplicate charges

If checkout fails, no tip is recorded and your card is not debited. If you believe you were charged incorrectly, contact your card issuer and your venue operator within 30 days with the Paystack reference from your receipt or bank statement.

Disputes between users

Service quality disputes are between the customer and the guard or merchant. Operators may offer goodwill credits at their discretion; this is not guaranteed by the software license.

Chargebacks

Unauthorised transaction claims are handled under Paystack and card network rules. Guards and merchants must cooperate with evidence requests. Repeated chargebacks may lead to account suspension.
