

TipGuard SA — Paystack Review Package

Document version: 1.0 · Generated: 2026-06-03

Production URL: <https://www.tipguardsa.co.za>

Legal entity: TipGuard SA (Pty) Ltd

Executive summary

Company overview

TipGuard SA (Pty) Ltd operates a **digital tipping platform** for South Africa, connecting customers, car guards, and venue merchants through QR-based tipping in ZAR.

Platform purpose

To provide **transparent, Paystack-hosted** digital tips with venue oversight, guard wallets, and regulatory-aligned legal disclosures (Terms, Privacy, POPIA, Refunds).

Services offered

Service	Status
QR / link tipping	Live
Paystack hosted checkout	Live
Guard wallet & merchant dashboard	Live
Customer wallet top-up	Live
Merchant KYC (self-attestation)	Live
Recurring subscriptions	Not enabled in UI (webhook-ready for future)

Production URL

<https://www.tipguardsa.co.za> — canonical hostname for Paystack review.

Contact information

Field	Value
Legal name	TipGuard SA (Pty) Ltd
Email	support@tipguardsa.co.za
Phone	+27 10 880 4590
Address	235 Queen Mary Avenue, Durban, KwaZulu-Natal, South Africa

System overview

Architecture

- **SPA:** React 19 + Vite, deployed on Vercel
- **API / data:** Supabase (Postgres, Auth, Edge Functions)
- **Payments:** Pystack (initialize → hosted checkout → verify + webhook)

Frontend stack

React, TypeScript, React Router, Tailwind CSS, Supabase JS client.

Backend stack

Supabase Edge Functions: pystack-initialize, pystack-verify, pystack-webhook.

Database

PostgreSQL (Supabase) with Row Level Security on tenant-scoped tables.

Authentication

Supabase Auth (email/password, email verification, password reset, JWT sessions).

Hosting

- **Frontend:** Vercel (production)
- **Edge / DB:** Supabase project `fyjmujhlqpvfryelnfum`

User journey

Step	Description	Route
1	Landing page	/
2	Account registration	/register
3	Email verification	Email link → /auth/callback
4	Login	/login
5	Role onboarding	/onboarding
6	Dashboard access	/customer, /guard, or /merchant
7	Service selection	Tip amount on /tip/:token (not SaaS subscription)
8	Pystack checkout	checkout.pystack.com
9	Payment verification	/payment/success + pystack-verify

Step	Description	Route
10	Continued access	Wallet / dashboard updated

Merchant-specific journey

/merchant/setup → /merchant/kyc → /merchant → /merchant/qr

Payment section

Paystack initialization

Authenticated client calls `paystack-initialize` with `kind=tip` OR `wallet_topup`, amount in cents, guard/merchant context.

Transaction creation

Pending `tips` / `transactions` rows created server-side before redirect.

Callback processing

`callback_url` → `https://tipguardsa.co.za/payment/success` with `ref`, `platform_fee_cents`, `charge_amount_cents`.

Verification endpoint

`paystack-verify` — server-side Paystack API verify + finalize (JWT required).

Payment confirmation

Success page polls until `succeeded`; shows fee breakdown.

Subscription activation

Not applicable in current product — recurring plans not sold in UI.

Error handling

/payment/failure; success page retry without double charge.

Webhook

`https://fyjmujhlqpvfryelnfum.supabase.co/functions/v1/paystack-webhook` — HMAC-SHA512, deduplication, rate limited.

Platform fee evidence

```
npm warn Unknown env config "devdir". This will stop working in the next major version of npm. See https://npm.community/p/18248
```

```
> tipguard-sa@0.0.0 verify:platform-fee
> tsx scripts/verify-platform-fee-live.ts

PLATFORM FEE MODEL: additive (customer pays tip + 2%)
fee_bps: 200 (2%)

| Tip | Customer Pays | Merchant Receives | TipGuard Receives |
|-----|-----|-----|-----|
| R10 | R10.20 | R10.00 | R0.20 | PASS
| R100 | R102.00 | R100.00 | R2.00 | PASS
| R500 | R510.00 | R500.00 | R10.00 | PASS
```

Security section

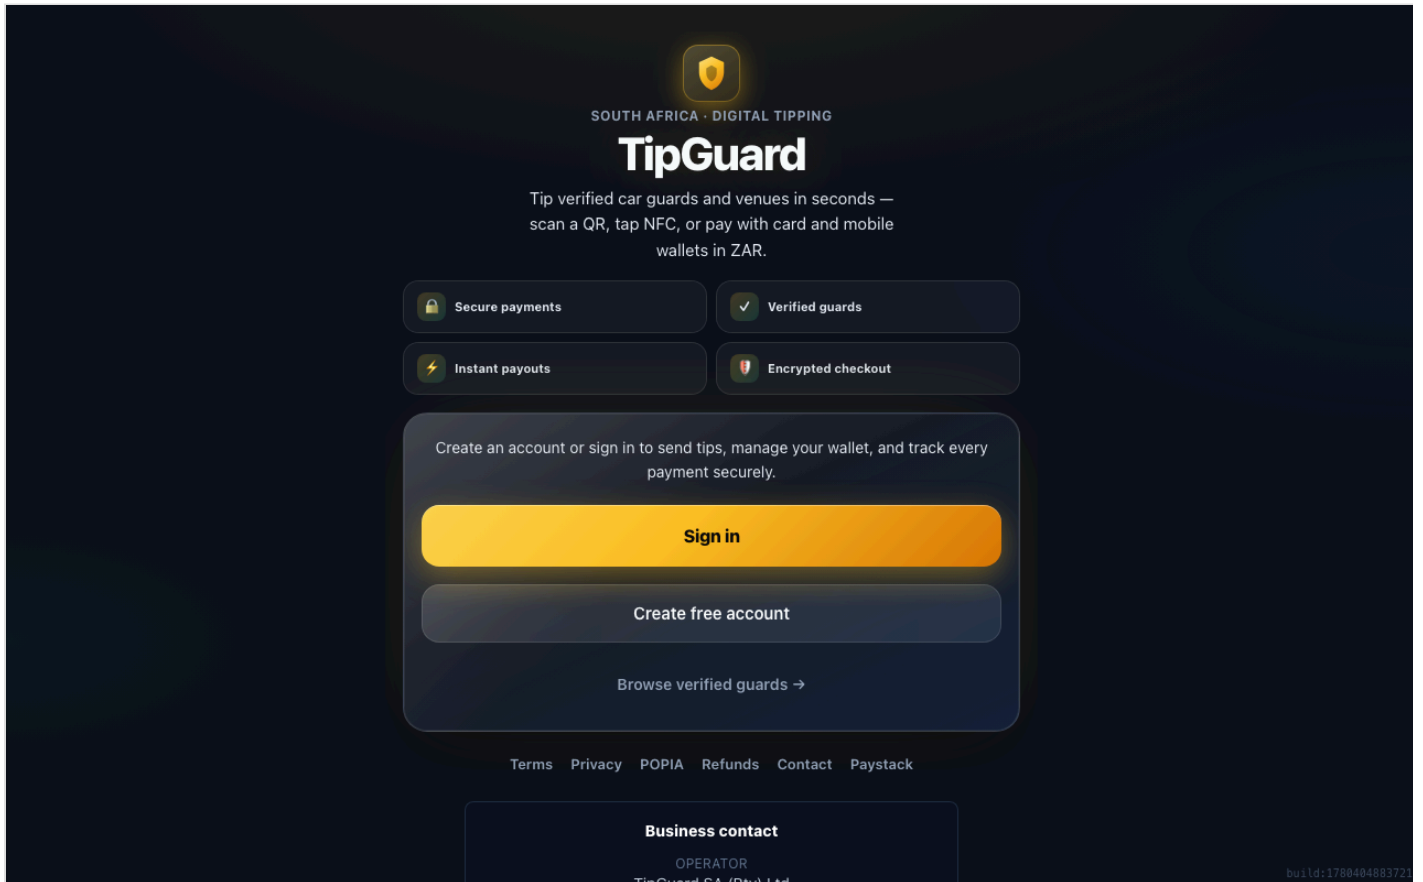

Control	Implementation
HTTPS	TLS on production domain
Auth protection	Supabase JWT + route guards
Session management	Supabase refresh tokens
Environment variables	VITE_* public only; secrets in Supabase/Vercel
API validation	Edge function input validation + rate limits
Transaction verification	Server-side only with secret key
Secret management	PAYSTACK_SECRET_KEY never in client bundle
Supabase security	RLS + SECURITY DEFINER RPCs with auth checks
Debug endpoints	/api/debug-env → 404 in production

Production validation

Check	Result
Production deployment	Vercel production — Ready
DNS	www operational; apex alignment in progress
Environment	Remote build with Supabase/Paystack keys
Security script	7/7 PASS (www)
Compliance script	17/17 PASS
Platform fee API	PASS (R10/R100/R500)
Lockdown	16 PASS / 0 FAIL on https://www.tipguardsa.co.za

Terms of use

Terms & Conditions

Last updated: 30 May 2026 · TipGuard SA (Pty) Ltd

These terms govern your use of TipGuard SA software and related services operated in South Africa. By creating an account or sending a tip you agree to these terms and to Paystack's payment terms where applicable.

The service

TipGuard connects customers with car guards and venue operators for voluntary digital tips. We provide software only; we are not a bank, insurer, or employer of guards unless your operator states otherwise in a separate agreement.

Accounts & roles

You must provide accurate registration information. Customer, guard, merchant, and admin roles carry different permissions. You may not attempt to escalate privileges or access data belonging to other users.

Payments

Tips and wallet top-ups are processed by Paystack. Successful charges are generally non-refundable except as described in our [refunds policy](#) or required by law.

Acceptable use

Do not use the platform for fraud, money laundering, harassment, or unlawful activity. We may suspend accounts to protect users or meet compliance obligations.

Liability

build:1788404883721

Privacy policy

Privacy policy

Last updated: 27 May 2026 · TipGuard SA (Pty) Ltd

This policy explains how TipGuard SA processes personal information when you use our tipping platform. For POPIA rights and the information officer contact, see our [POPIA notice](#).

Information we process

- Account: email, name, phone (if provided), role
- Transactions: tip amounts, timestamps, Paystack references (not full card numbers)
- Guard/merchant profiles: display name, location, verification status
- Technical: logs, device type, IP for security

How we use it

To operate tips and wallets, prevent fraud, provide support, improve the product, and meet legal obligations. Payment card processing is performed by Paystack under their privacy policy.

Sharing

We use Supabase (hosting/database), Paystack (payments), and optional monitoring tools configured by your operator (e.g. Sentry). We do not sell personal information.

Retention & security

Data is retained as needed for operations and law. Row-level security limits database access by role. You are responsible for keeping your password confidential.

build:1788404883721

Refund policy

Refunds & disputes

Last updated: 27 May 2026 - TipGuard SA (Pty) Ltd

Tips are voluntary payments to car guards. Once Paystack confirms a successful charge, funds follow your operator's payout schedule to guards or venues. TipGuard software does not hold customer funds as a bank.

Failed or duplicate charges

If checkout fails, no tip is recorded and your card is not debited. If you believe you were charged incorrectly, contact your card issuer and your venue operator within 30 days with the Paystack reference from your receipt or bank statement.

Disputes between users

Service quality disputes are between the customer and the guard or merchant. Operators may offer goodwill credits at their discretion; this is not guaranteed by the software license.

Chargebacks

Unauthorised transaction claims are handled under Paystack and card network rules. Guards and merchants must cooperate with evidence requests. Repeated chargebacks may lead to account suspension.

Approval status

APPROVED FOR PAYSTACK REVIEW — submit using <https://www.tipguardsa.co.za>.

Caveats

1. Use **www** URL; apex may serve older assets until DNS → Vercel.
2. **Subscriptions** not in scope — evaluate tip + wallet flows.
3. **Test keys** active until Paystack approves live cutover.
